

EXTRA FONTS DISC N°3

From the creators of MicroDesign2

This disc contains a variety of new typefaces and character designs which extend the capabilities of MicroDesign2 in two ways ...

Firstly, by adding more Font files. These files can be found on the side of the disc labelled .MDFs. They may be used for Typesetting and Writing in the normal way, and include a range of decorative and standard typefaces to complement the existing library of fonts for MicroDesign2.

Secondly by increasing the size of available characters. The .MDAs side of this disc contains sets of larger lettering styles stored as MicroDesign2 Area files. These larger designs may be cut and pasted into headlines, banners etc.

A full catalogue of all these Fonts and character sets is provided in this booklet.
