TAU CETI

After the void of space the colonists return to Tau Ceti. After the great plague the time has come to start life afresh on the deserted planet.

One pilot has been chosen to make the planet safe again.

.....You.

To Run use the System CP/H Disc.

Type: play (Return).

All program and data files are down loaded into memory and the game disc may be removed.

The commands available are given below along with a short description.

HELP

Lists commands as below.

LAUNCH

Normally ground mode is only active when you are docked. Launch will send the skimmer out onto the planets surface and activate flight mode.

MAP

The computer will display a map of the planet showing information about the cities. Use Left, Right, Up, Down and Fire keys to move the cursor over the map and fire to select a function.

RODS

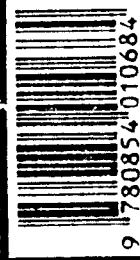

This will allow you to assemble cooling rods found throughout your mission.

REACTOR

When docked with the Main Central Reactor on Centrauis will give you access to the reactor room.

LOCK Shows a view inside the building.

In 2050 the last wave of colonists left Earth for the nearby Solar system of Tau Ceti, as the first wave of man's great adventure. On the inhospitable desert world of Tau Ceti II a new life began. In ninety years thirty great cities were built, until without warning a great plague decimated the new world. The remaining desperate colonists were evacuated and in time a cure was found. An expedition force was dispatched and then destroyed by the now flourishing hostile defence systems. The only way to incapacitate the automatic defenders was to shut down the massive fusion reactor that fuelled the planet. It was decided that a single highly skilled pilot in an armed ground skimmer might succeed where fifty would surely fail. Like a fool you volunteered.
